2. Avoid capital expenditure

3. Improve efficiency

4. Offload non-core functions

5. Get access to specialized skills

6. Save on manpower and training costs

7. Reduce operating costs

8. Improve speed and service

9. Establish long-term, strategic relationships with world-class service providers to gain a competitive edge

10. Enhance tactical and strategic advantages

11. Focus on strategic thinking, process reengineering and managing trading partner relationships

12. Spread your risks

13. Provide the best quality services, products and people

14. be reliable and innovative

15. Provide value-added services

16. Increase customer satisfaction

17. Avoid the cost of chasing technology

18. Leverage the provider's extensive investments in technology, methodologies and people

19. Benefit from the provider's expertise in solving problems for a variety of clients with similar requirements.

20. Focus scarce resources on time-critical projects such as application reengineering

21. Obtain needed project management and implementation consulting expertise, along with access to best practices and proven methodologies

22. Reduce the risk of technological obsolescence and increase efficiency by consolidating and centralizing functions

23. Keep pace and minimize the impact of rapid changes in applications and standards

24. Extend the reach to more trading partners quickly and efficiently

25. Reduce the overall IT management burden while retaining control of strategic decision making.

We do the works for you, at low cost with high quality out put.
